## Skills

Stress tolerance and communication skills, team management skills.

Extensive knowledge of JS, TS, React, React Native, NodeJS and a large number of technologies and programming languages that are used in the development of highly loaded systems. Conducting technical interviews. Scrum master.

Six years of experience in the development of high-load systems. The strengths are stress resistance and diligence. The ability to find a common language with almost any person. Extensive technical knowledge in the field of development. Due to my degree in the field of information security, I have sufficient knowledge to ensure a high level of application security. I am constantly learning new technologies and methodologies, developing both as a developer and as a manager. I conduct technical interviews, which are highly appreciated by candidates. I manage the frontend development team. Good knowledge of Agile. I'm a Scrum master in my team, conduct scrum events and keep track of the team's sprint tasks.
